

Stop water damage quick!

Overview

It's a fact that fire sprinklers save lives. They can also cause a lot of damage if accidentally discharged or broken. When this occurs the sprinkler system has to be shut off and fire watch maintained until repairs can be made leaving the property vulnerable. A Quickstop fire sprinkler tool can stop an accidentally activated or damaged sprinkler head in seconds whether the sprinkler head is intact, damaged or completely sheared off. With the Quickstop tool, the sprinkler system can remain active until a contractor or maintenance is ready to complete repairs. A fusible link in the tool will allow activation if needed while the tool is temporarily in place. As a Berkley Human Services customer, these products are available to you at discounted rates.
